for making the safer choice.

「MUST HAVE」 KneeGuardKids

Thank you for choosing KneeGuardKids COMMON SENSE II
Before using this product, ensure to read instruction and fully understand it.
Use the product in accordance with instruction.

KneeGuardKids Solutions

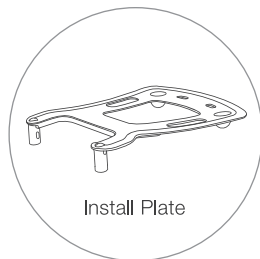

Protect your children's knees **from gravity** while sitting on their car seat

- While kids are sitting on a car seat, their legs are being pulled by gravity. If left alone, with no intervention, the ligaments in your child's knee will have continuous stress. This continuous stress could lead to growth problems.
- **KneeGuardKids is here to protect the well being of your children from the damaging effects of gravity.**

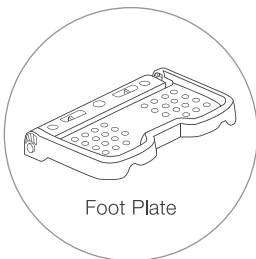

Provide comfort and **stability** to your kids

- When our legs hang freely, in time, it starts to be uncomfortable. Sitting in a car seat causes unnecessary pressure from the seat belt, which reduces blood circulation. This interruption will cause pain and discomfort for your children's legs and knees.
- **Using KneeGuardKids will keep the blood circulation flowing freely within your child's legs, reducing all discomfort.**

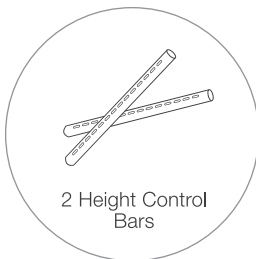

Product main parts
